ABOUT ME

Hello! I am Fran, a backend developer specialized in Java ,Spring with solid experience in creating robust and scalable solutions. My focus is on software architecture and the implementation of efficient systems.

EDUCATION

- **Information Systems Bachelor Degree**
  UNIVERSIDAD NACIONAL DEL NORDESTE (UNNE)

- **Backend Java Developer**
  FOLCADEMY- 2023

- Centification Microservices y APIs REST with Spring Framework, OAuth2 y Docker

  UDEMY- 2023
- **Centification with Laravel MVC y PHP**
  UDEMY - 2021

LANGUAGES

INGLES - Nivel B1
SPANISH - Native speaker

EXPERIENCE

TRES HERMANITOS: I developed an ecommerce with a microservices architecture based on Java and Spring, using a clean architecture in each module, respecting SOLID principles, I implemented a React client and deployed the application in Docker containers in the cloud.

SKILLS Y TECHNOLOGIES

- Microservices Architecture
- Java
- Spring Framework
- Spring Cloud
- Spring Boot
- Docker
- Clean Architecture
- Git
- Hibernate
- Maven
- DBs relationals (MySQL)
- ReactJS
- JSON Web Tokens (JWT)
- SOLID
- TDD
- OOP
- NestJS
- Typescript
- NodeJS
- AWS

PAO OJEDA STORE: I designed and developed a clothing store with a microservices architecture, in Java and Spring, TDD using Mockito and Junit, integrated with the paid market API I implemented a React client and deployed the application in Docker containers in the cloud

- REST APIs
- Java
- Spring Framework
- Spring Cloud
- Spring Config
- Spring Boot
- Clean Architecture
- GIT
- Unit test (Junit, Mockito)
- BD relacionales (MySQL, MS SQL, Oracle, MySQL, Postgres)
- Jenkins
- Mercado Pago API
- AWS
- Maven
- Docker Containers
- ReactJS
- Nginx
- Integración Continua
- JSON Web Token (JWT)
- SOLID
- Docker
- TDD
- POO
- Design Patterns
- Linux
- Jira
